## SKILLS

HTML5 / CSS3

JavaScript

Java

Tailwind CSS

Git / GitHub

PC Hardware

UI/UX Basics

## LANGUAGES

Arabic

Native

English

Proficient

## PROFESSIONAL PROFILE

A dedicated Information Technology student with a strong passion for building digital solutions. Skilled in full-stack web development and computer hardware architecture. I combine technical expertise with a user-centric approach to create functional and aesthetically pleasing applications. Eager to launch a career in software development or IT support.

## KEY PROJECTS

### Smart PC Builder

Web Application

- Developed an interactive tool that recommends PC parts based on user budget and usage type.
- Integrated **Google Gemini API** to provide AI-powered summaries and real-time advice.
- Implemented a unique feature to estimate used market prices (Haraj) in Saudi Arabia.

### "Henkah World" Game

Game Development

- Designed a logic-based browser game focusing on problem-solving.
- Utilized advanced DOM manipulation and JavaScript logic for game mechanics.

### JUnit Calculator

Software Testing

- Built a mathematical calculator with comprehensive unit testing using **JUnit 5**.
- Ensured code reliability through rigorous test cases and error handling.

## EDUCATION

### Bachelor of Information Technology

King Abdulaziz University

Expected Graduation

2027
