### EDUCATION

#### Bachelor of IT

King Abdulaziz University

Expected Graduation: 2027

### TECHNICAL SKILLS

HTML5/CSS3

JavaScript

Java

Tailwind CSS

Git/GitHub

UI/UX Basics

PC Hardware

### LANGUAGES

Arabic Native

English Proficient

A dedicated Information Technology student with a strong passion for building digital solutions. Skilled in full-stack web development and computer hardware architecture. I combine technical expertise with a user-centric approach to create functional applications, eager to launch a career in software development.

### KEY PROJECTS

#### Smart PC Builder

Web App

- Developed an interactive tool recommending PC parts based on budget.
- Integrated **Google Gemini API** for AI-powered summaries.
- Implemented a unique feature to estimate used market prices (Haraj).

#### "Henkah World" Game

Game Dev

- Designed a logic-based browser game focusing on problem-solving.
- Utilized advanced **DOM manipulation** and JavaScript logic for mechanics.

#### JUnit Calculator

Testing

- Built a mathematical calculator with comprehensive unit testing using **JUnit 5**.
- Ensured code reliability through rigorous test cases.
